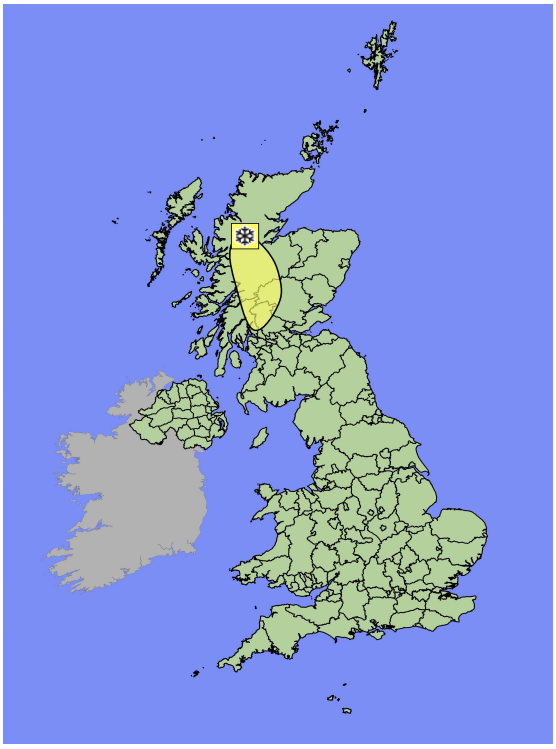
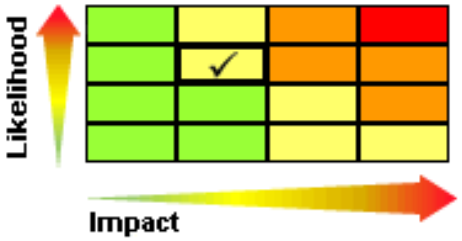
National Severe Weather Warning Service





Chief Forecasters Assessment
A frontal system is expected to bring a band of rain and sleet into the far northwest of Scotland later on Sunday morning, turning increasingly to snow as it moves southeast over inland areas of Scotland during the afternoon and evening. A further band of sleet and snow is expected to follow into northwestern parts later in the evening.

Amounts of snow will be variable, with some low lying areas to the southeast of high ground seeing very little lying snow, whilst upland areas exposed to the northwest are liable to receive more significant falls of snow.

Please note that an another Alert has been issued for Monday, although the snow should clear from southern Scotland by midday on Monday.

The Met Office have issued a **Yellow Warning** of **Snow**

Valid from **00:05 on Sun, 13th Jan 2013** until **12:00 on Sun, 13th Jan 2013**

Snowfalls will develop across western Scotland during Saturday night and Sunday morning. Inland, away from the western coastal fringes, the snow is liable to settle. Falls of 2-5 cm of snow are likely on ground above 200 m with local accumulations of 10 cm.

The public should be aware of the risk of disruption to travel.
